2. *We are exposed to time and cost overrun risks on our lump-sum price and rate contracts, resulting in reduced profits or losses.*

Although some of our projects are cost-reimbursable contracts that allocate the risk of time and cost overruns to our clients, a significant proportion of our contracts are lump-sum or rate contracts where we bear the risk of time and cost overruns unless contractually excluded under certain circumstances such as changes in scope of work. Our expenditure in executing a lump-sum contract may vary substantially from the assumptions underlying our bid for several reasons, including unanticipated changes in engineering design of the project, unanticipated increases in the cost of equipment, material or manpower, delays associated with the delivery of equipment and materials to the project site, unforeseen construction conditions, including inability of the client to obtain requisite environmental and other approvals, delays caused by local weather conditions and suppliers’ or subcontractors’ failure to perform. Equipment, materials, labour cost and sub contract costs constitute a significant part of our operating expenses, and unanticipated increases in such costs if not taken into account in our bid may affect our results of operations. Our expenses incurred on a project may increase beyond the lump-sum price or rate we have agreed, on account of various factors, including:

- unanticipated increases in the cost of equipment, materials or manpower;
- delays associated with the delivery of equipment and materials to the project site;
- unforeseen construction conditions, including inability of the client to obtain requisite environmental and other approvals, resulting in delays and increased costs;
- delays caused by weather conditions;
- local strikes, work stoppages, and curfews by political parties;
- adverse changes to the relevant legal, regulatory or tax regimes;
- suppliers’ or subcontractors’ failure to perform; and
- delays caused by the parties to the contract.

In many of these contracts, we may not be able to obtain compensation for additional work performed or expenses incurred. Even under our cost-reimbursable contracts, where we do not bear the risk of cost-overruns, costs can exceed client expectations, resulting in delays or even cancellations of the contract. Depending on the size of a project, these variations from estimated contract performance could have a significant effect on our results of operations.

3. *Our business is working capital intensive. If we experience insufficient cash flows to meet required payments on our working capital requirements, there may be an adverse effect on our operations.*

Our business requires a significant amount of working capital which is based on certain assumptions, and therefore, any change of such assumptions would result in changes to our working capital requirements. In many contracts, significant amounts of working capital are required to finance the purchase of materials and the performance of contracts and other work on projects before payment is received from clients. Our working capital requirements may increase due to an increase in the size of our operations and the number and size of projects that are required to be executed within a similar timeframe. Since the contracts we bid typically involve a lengthy and complex bidding and selection process which is affected by a number of factors, it is generally difficult to predict whether or when a particular contract we have bid for will be awarded to us and the time period within which we will be required to mobilize our resources for the execution of such contract. In addition, we may need to incur additional indebtedness in the future to satisfy our working capital requirements.

Most of our projects provide for progress payments from clients with reference to the value of work completed upon reaching certain milestones. Generally, in our power sector projects, the client, or a third party authorized under the contract, usually makes payment against invoices raised upon mutual agreement. As a result, significant amounts of our working capital is required to finance the purchase of materials and the performance of our work on projects before payment is received from clients.

We are typically required to provide financial and performance guarantees guaranteeing our performance and/or financial obligations in relation to a project. Some of the performance guarantees are secured by guarantees from banks. Our working capital requirements may increase if, in certain contracts, payment terms include reduced advance payments or payment schedules that specify payment towards the end of a project or are less favorable to us. Delays in progress payments or release of retention money or guarantees in form of bank guarantees from our clients may increase our working capital requirements. We may file a claim for compensation of the loss that we incurred pursuant to our contracts but settlement of disputes generally takes time and financial and other resources, and the outcome is often uncertain.

In general, we may make provisions for bad debts, including those arising from progress payments or release of retention money, based primarily on ageing and other factors such as special circumstances relating to specific clients. There can be no assurance that the progress payments and the retention money will be remitted by our clients to us on a timely basis or that we will be able to efficiently manage the level of bad debt arising from such payment practice. Our working capital position is therefore also dependent on the financial position of our clients. All of these factors may result in increases in the amount of our receivables and short-term borrowings. Continued increases in working capital requirements may have an effect on our financial condition and results of operations.

4. *Risks inherent to power sector projects could materially and adversely affect our business, financial condition and results of operations.*

Most of our projects are in the power sector. Power sector projects have long gestation periods before they become operational and carry project-specific as well as general risks. These risks are generally beyond our control and include:

- Political, regulatory, fiscal, monetary and legal actions and policies that may adversely affect the viability of power projects, and have an effect on our future projects.
- Changes in government and regulatory policies relating to the power sector (including withdrawal of fiscal or other incentives which may have been provided by the government);
- Delays in the construction of projects we are engaged on;
- Adverse changes in demand for, or the price of, power generated or distributed by the projects we are engaged on;
- The willingness and ability of consumers to pay for the power produced by projects we are engaged on;
- Increased project costs due to environmental challenges and changes in environmental regulations;
- Failure of third parties such as contractors, sub-contractors and others to perform on their contractual obligations in respect of projects we are engaged on;
- Economic, political and social instability or occurrences such as natural disasters, armed conflict and terrorist attacks, particularly where projects are located or in the markets they are intended to serve;
- Delay in obtaining/renewing regulatory or environmental clearances and suspension or cancellation due to non-conformity with conditions stipulated under the clearance; and

In addition, any significant change in the project plans of our clients or change in our relationship with these existing clients may affect our business prospects. Furthermore, successful implementation of the projects we are engaged on are dependent on our client's financial condition, as any adverse change in their financial condition may affect the financing and consequently the implementation of the projects. In the event the power projects we are engaged on are cancelled or delayed or otherwise adversely affected, our results of operations and financial condition could be affected.

For further details of our Business, please refer chapter titled "Our Business" beginning on Page 93 of Draft Prospectus.

5. *We have had certain inaccuracy in relation to regulatory filings to be made with the RoC and our company has made non-compliances of certain provision under applicable law.*

Our Company has in the past not complied with certain provisions of the Companies Act, 1956 and the Companies Act, 2013, For instance, the forms which was filed in registrar of Companies have some factual discrepancy and errors and also belatedly filed & not registered with ROC. Also our Company has not made satisfaction of certain charges filed in Registrar of Companies. Further our Company may have not complied with some Accounting Standard For instance, Accounting Standards 15 in audited and restated financials statement of the Company.

The occurrence of any of these factors could significantly affect our results of operations and financial condition. Any disruption in our operations due to disputes or other issues with our employees or contract labor work force may adversely affect our business and results of operations. Long periods of business disruption could result in a loss of customers. Although we take precautions to minimize the risk of any significant operational problems at our operation sites, there can be no assurance that we will not face such disruptions in the future.

7. *Our inability to effectively manage our growth or to successfully implement our business plan and growth strategy could have an effect on our business, results of operations and financial condition.*

The success of our business will depend greatly on our ability to effectively implement our business and growth strategy. Our growth strategy involves focusing on Optimal Utilization of Resources and to developed relationships with customer. For further details, see the section titled “Our Business” on page 93 of this Draft Prospectus. Our success in implementing our growth strategies may be affected by:

- Changes in the Indian regulatory environment in field of service industry

There can be no assurance that we will be able to execute our strategy on time and within our estimated budget, or that our expansion and development plans will increase our profitability. Any of these factors could impact our results of operations. We cannot assure you that we will not face any time or cost overruns in respect of implementation of our strategies in the future. Further, we expect our growth strategy to place significant demands on our management, financial and other resources and require us to continue developing and improving our operational, financial and other internal controls. Our inability to manage our business and implement our growth strategy could have a effect on our business, financial condition and profitability.

8. *Our top five customers contribute approximately 98.61 % of our revenues for the period ended May 31, 2017. Any loss of business from one or more of them may adversely affect our revenues and profitability.*

Our top five customers contribute approximately 98.61 % of our revenues for the period ended May 31, 2017. Any decline in our quality standards, growing competition and any change in the demand for our products & services by these customers may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability. However, the composition and revenue generated from these clients might change as we continue to add new clients in normal course of business. We intend to retain our customers by offering solutions to address specific needs in a proactive, cost effective and time efficient manner. This helps us in providing better value to each customer thereby increasing our engagement with our new and existing customer base that presents a substantial opportunity for growth.

For further of our five top customers, please refer chapter titled “Management’s Discussion & Analysis of Financial Conditions & Results of Operations” beginning on Page 208 of Draft Prospectus.

9. We are exposed to the risk of delays or non-payment by our clients and other counterparties, which may also result in cash flow mismatches.

We are exposed to counterparty credit risk in the usual course of our business dealings with our clients or other counterparties who may delay or fail to make payments or perform their other contractual obligations. The financial condition of our clients, business partners, suppliers and other counterparties may be affected by the performance of their business which may be impacted by several factors including general economic conditions. We cannot assure you of the continued viability of our counterparties or that we will accurately assess their creditworthiness. We also cannot assure you that we will be able to collect the whole or any part of any overdue payments. Any material non-payment or non-performance by our clients, business partners, suppliers or other counterparties could affect our financial condition, results of operations and cash flows.

For further details of our Business and Clients, Please refer chapter titled “Our Business” and “Management Discussion & Analysis of Financials Conditions and Result of Operation” beginning on Page 93 & 208 of this Draft Prospectus.

10. A part of our business transactions are with government or government funded entities or public sector companies which may expose us to risk, including additional regulatory scrutiny and pricing pressure. Any change in government policies or focus may affect our business and results of operations.

Our business is primarily dependent on projects in the power sector undertaken by power utilities, many of which are public sector undertakings. In relation to such government contracts, we may be subject to additional regulatory scrutiny associated with commercial transactions with government owned or controlled entities and public sector companies. Furthermore in certain instances, we may face delays associated with collection of receivables from government owned or controlled entities. In addition, since government contracts are subject to specific procurement regulations and a variety of other socio-economic requirements, our clients must comply with such requirements. These regulations and requirements affect how we transact business with our clients and, in some instances, impose additional costs on our business operations. Further, any change in the government or changes in governmental policies or practices that results in a slowdown in power projects, may affect our business and results of operations.

11. We have experienced negative cash flows in the past. Any such negative cash flows in the future could affect our business, results of operations and prospects.

Our Company had reported certain negative cash flows from our operating, investing activities and financing activities in the previous years as per the Restated Standalone Financial Statements and the same are summarized as under:

Particulars	For Period ended May 31, 2017	For the year ended March 31,				
		2017	2016	2015	2014	2013
Cash flow from Operating Activities	203.04	(201.39)	(33.07)	(80.66)	7.90	299.08
Cash flow from Investing Activities	(0.99)	(76.38)	(9.52)	(127.00)	(8.02)	(278.21)
Cash flow from Financing Activities	(201.59)	365.51	45.14	204.28	27.46	(20.39)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If our Company is not able to generate sufficient cash flows, it may affect our business and financial operations. For further please refer chapter titled “Financial Information of the company” beginning on Page 143 of this Draft Prospectus.

12. An inability to effectively manage project execution may lead to project delays which may affect our business and results of operations.

Our business is dependent on our ability to effectively manage the execution of our projects. An inability to effectively manage our operations, including ineffective or inefficient project management procedures could increase our costs and expenses, result in project delays and thereby affect our profitability. The effectiveness of our project management processes and our ability to execute projects in a timely manner may be affected by various factors.

Additionally, in some contracts, in case of delay due to our fault or because of defective work done by us, clients have the right to rectify the defective work, or engage a third party to complete the work and to deduct additional costs or charges incurred for

completion of the work from the contract price payable to us. In addition, most contracts that we enter into are subject to certain completion schedule requirements with liquidated damages in the event schedules are not met as a result of circumstances within our control. Further if a project is delayed our customers may invoke the bank guarantees that we have provided in connection with the performance of the project or retain our security deposits as compensation for such damages. Such factors would have an effect on our results of operations and financial condition.

13. Claims made by us against our clients for payments and failure by us to recover adequately on future claims in part or at all could have effect on our financial condition, results of operation and cash flows.

Project claims are brought by us against our clients for additional work and costs incurred in excess of the contract price or amounts not included in the contract price. These claims typically arise from changes in the initial scope of work or from delays caused by the client. These claims are often subject to lengthy discussions and delayed clearances or acceptance from customer.. The costs associated with these changes or client caused delays include additional direct costs, such as labor and material costs associated with the performance of the additional work, as well as indirect costs that may arise due to delays in the completion of the project, such as increased labor costs resulting from changes in labor markets. We may have used significant additional working capital in projects with cost overruns pending the resolution of the relevant project claims. In general, we cannot guarantee that such claims will be paid, in part or at all. Project claims may continue in the future. We may also face a number of counterclaims initiated against us by certain clients in connection with our project claims. If we are found liable for any of these claims, we would have to resort to write downs and charges against our earnings to the extent a reserve is not established. Failure to recover amounts under these claims and/or counterclaims could have a material adverse effect on our results of operations, liquidity and financial condition.

14. Any failure to comply with financial and other restrictive covenants imposed on us under our financing agreements may affect our operational flexibility, business, results of operations and prospects.

As on May 31, 2017, our total secured borrowings amounted to Rs. 903.78 Lacs. Our leverage has several important consequences, including the following:

- A portion of our cash flow will be used towards working capital requirements and other general corporate purposes;
- Our borrowing cost and the existence of encumbrances on a significant portion of our immovable properties may constrain. In the event of enforcement of an event of default in connection with such secured borrowings (which is not waived or cured), our ability to continue to operate our business at such locations may be restricted;
- Fluctuations in interest rates may affect our cost of borrowing, as all or a substantial part of our borrowings is at floating rates of interest; and
- Our financing agreements require us to obtain the consent of, or to intimate, our lenders for certain actions including change in shareholding or directorship of our Company, drawdown of further loans, issuance of guarantees, extending loans to our Subsidiaries when money remains due to the lenders, and for certain corporate actions, including alterations to our Memorandum and Articles of Association. Our failure to comply with financial or restrictive covenants or periodic reporting requirements or to obtain our lenders' consent to take certain actions in a timely manner or at all may result in declaration of an event of default by any current or future lenders, which may accelerate repayment or increase applicable interest rates or trigger cross-default or cross-acceleration under other financing agreements.

The termination of, or declaration or enforcement of default under, any current or future financing agreement (if not waived or cured) may affect our ability to raise additional funds or renew maturing borrowings to finance our existing operations and pursue our growth initiatives and, therefore, have an effect on our business, results of operations and prospects.

For further details of our loans, Please refer chapter titled "Statement of Financial Indebtedness" beginning on Page 206 of this Draft Prospectus

15. We require various statutory and regulatory permits and approvals in the ordinary course of our business, and our failure to obtain, renew or maintain them in a timely manner may affect our operations.

The power sector and other industries where we intend to increase our operations are regulated by laws, rules and regulations issued by various regulatory authorities. These laws, rules and regulations have changed significantly over the years, and there can be no

assurance that any future changes to such regulations will not affect our business prospects, results of operations or financial condition.

We, may require various regulatory approvals, sanctions, licenses, registrations and permissions including environmental clearances in connection with our operations and the various project development activities involved in such projects. We may face significant uncertainties due to various factors in obtaining or maintaining such approvals. Also our company have yet to apply for shop and establishment registration under shop and establishment Act for corporate office, registered office & branch and our Company is recently converted from Private limited to Public limited Company and we are in process for renewal of registrations for change in name. If such approvals are not obtained in a timely manner or at all, there may be a material effect on various project development activities, including our operations, thereby affecting our results of operations and financial condition. Furthermore, our government approvals and licenses are subject to numerous conditions, some of which are onerous and require us to incur substantial expenditures. If we fail to comply or a regulator alleges that we have not complied with these conditions, our business, prospects, financial condition and results of operations may be affected. While we typically apply for the renewal of any existing regulatory approvals prior to their expiry dates, there can be no assurance that we will receive such renewal in time or at all. For further details of our approvals, please see “Government and other Approvals” on Page 225 of this Draft Prospectus.

16. Our operations are subject to a variety of environmental laws and regulations including those relating to hazardous materials. Any failure to comply with applicable environmental laws and regulations could have an effect on our financial condition and results of operations.

Our operations are subject to numerous environmental protection laws and regulations, which are complex and stringent. The Engineering, procurement and construction contracts of power Projects, raw materials used in the development of power projects and solar plants, the impact of noise pollution from construction activities and transportation at our project sites are subject to various environmental laws and regulations. In the event that such regulations become more stringent, such as increasing the requirements for obtaining approvals or meeting government standards, this could result in changes to the infrastructure necessary for power projects and their technical requirements, increasing the costs related to changing construction methods in order to meet government standards and increasing penalties for non-compliance. Furthermore, we may incur significant expenditure relating to operating methodologies and standards in order to comply with applicable environmental laws and regulations.

In addition, our projects may involve the handling of hazardous materials, which, if improperly handled or disposed of, could subject us to civil and criminal liabilities. Further certain environmental laws provide for joint and several liability for remediation of releases of hazardous substances, rendering a person liable for environmental damage without regards to negligence or fault on the part of such person. In addition to potential liabilities that may be incurred in satisfying these requirements, we may be subject to claims alleging personal injury or property damage as a result of alleged exposure to hazardous substances. We are also subject to regulations dealing with occupational health and safety. Such laws and regulations may expose us to liability arising out of the conduct of operations or conditions caused by others, or for our own acts. Sanctions for failure to comply with these laws, rules and regulations, many of which may be applied retroactively, may include administrative, civil and criminal penalties, revocation of permits and corrective orders.

17. Some of our corporate records including certain secretarial records for transfer of Equity Shares and forms filed in registrar of companies prior to 2006 are not traceable.

We are unable to trace certain corporate and other documents in relation to our Company including ROC forms and transfer deeds prior to the year 2006. We cannot assure you that the filings were made in a timely manner and that we shall not be subject to penalties on this account. Further online filing of Roc Documents was initiated in the year 2006 and all forms prior to the said year were physically filed, hence certain of these forms could not be retrieved from Ministry of Corporate Affairs (MCA) portal. We cannot further assure you that we will not be penalized by the relevant supervisory and regulatory authorities in India for not maintaining or executing such documents.

18. We have entered into, and will continue to enter into, related party transactions, and we cannot assure you that we could not have achieved more favorable terms had such transactions not been entered into with related parties.

We have entered into certain transactions with related parties, including our Promoters and Group Companies including subsidiaries and may continue to do so in the future. These transactions entered into with, among others, our Promoters and Group Companies including subsidiaries typically relate to, among others, remuneration and investments. The transactions we have entered into have involved, and any future transactions with our related parties could potentially involve, conflicts of interest. We will continue to

enter into such transactions and we cannot assure you that we could not have achieved more favorable terms had such transactions not been entered into with related parties. Certain decisions concerning our operations or financial structure may present conflicts of interest among our Promoter, other shareholders, directors and executive officers. Our shareholders, directors, and executive officers may have an interest in pursuing transactions that, in their judgment, enhance the value of their equity investment, even though such transactions may involve risks to our shareholders. We cannot assure you that our directors and executive officers will be able to address these or other conflicts of interests in an impartial manner, or at all. We also cannot assure you that such transactions, individually or in the aggregate, will not affect our financial condition and results of operations. For more information see “Related Party Transactions” on page 165 of this Draft Prospectus

19. We have significant ongoing funding requirements and may not be able to raise additional capital in the future. As a result we may not be able to respond to business opportunities, challenges or unforeseen circumstances.

Our major fund based and non fund based financial assistance has been sanctioned by the bank, i.e. the Jammu & Kashmir Bank on the security of assets. The Company is dependent on the Jammu & Kashmir Bank for its Working Capital requirement and any default under such arrangement with such lender may create problem for operation of the Company, which may affect the financial stability of the Company. At the same time this may result into difficulty in arranging for funds for re-payment and may also affect the financial position of the Company. If we are unable in the future to generate sufficient cash flow from operations or borrow the necessary capital to fund our future capital expenditures, we will be forced to limit our growth. In addition, we may not be able to service our existing customers or to acquire new customers. The inability to raise additional capital on acceptable terms could have an effect on our business, results of operations and financial condition.

For further details of our loans, Please refer chapter titled “Statement of Financial Indebtedness” beginning on Page 206 of this Draft Prospectus.

20. Our continued success is dependent on our senior management and skilled manpower. Our inability to attract and retain key personnel or the loss of services of our Promoter or Managing Director may have an effect on our business prospects.

Our Promoter, Managing Director and senior management have significantly contributed to the growth of our business, and our future success is dependent on the continued services of our senior management team. Our Managing Director has been employed with our Company since our incorporation. An inability to retain any key managerial personnel may have an effect on our operations. We might face challenges in recruiting suitably skilled personnel, particularly as we continue to grow and diversify our operations. In the future, we may also not be able to compete with other larger companies for suitably skilled personnel due to their ability to offer more competitive compensation and benefits. The loss of any of the members of our senior management team, our whole time directors or other key personnel or an inability on our part to manage the attrition levels; may impact our business, results of operations, financial condition and growth prospects.

The success of our business is also dependent upon our ability to hire, retain, and utilize qualified personnel and corporate management professionals who have the required experience and expertise. From time to time, it may be difficult to attract and retain qualified individuals with the requisite expertise and we may not be able to satisfy the demand from customers for our services because of our inability to successfully hire and retain qualified personnel.

Such skilled personnel may also not be easily available in the market. In addition, as some of our key personnel approach retirement age, we need to have appropriate succession plans in place and to successfully implement such plans. If we cannot attract and retain qualified personnel or effectively implement appropriate succession plans, it could have a material impact on our business, financial condition, and results of operations. Moreover, we may be unable to manage knowledge developed internally, which may be lost in the event of our inability to retain employees.

Certain of these contracts may require us to comply with the code of conduct and rules and regulations prescribed by our clients, which may increase our compliance costs. We may be unable to effectively address service constraints or accurately predict service requirements, as a result of which our clients may experience service shortfalls. Any disruptions to our businesses, including as a result of actions outside of our control, could significantly impact the continued performance of our contractual obligations to meet the quality or performance standards set out in our client contracts which may in-turn harm and cause clients to terminate their contracts with us, impair our ability to obtain renewal of our contracts from existing clients and impair our ability to grow our client base, any of which could affect our business, financial condition and results of operations. In the event that we are unable to meet the prescribed obligations, we may also be required to pay compensation or liquidated damages to our clients on the terms set out in our contracts. In certain instances, we may also be required to bear consequential liability. Certain contracts may also require us to provide indemnities to our clients with respect of any negligent act or omission by or misconduct of our employees. In the event there is an increase in claims against us for which we are not insured, our business, financial condition and results of operations may be affected.

23. *Misconduct or errors by employees engaged by us could expose us to business risks or losses that could affect our business prospects, results of operations and financial condition.*

Misconduct or errors by employees engaged by us could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our business. Substantially all of our secured debt carries interest at floating interest rates or at rates that are subject to adjustments at specified intervals. We may further be unable to pass any increase in interest expense to our existing customers. Any such increase in interest expense may have a effect on our business, financial condition, results of operations and cash flows. Furthermore, if we decide to enter into agreements to hedge our interest rate risk, there can be no assurance that we will be able to do so on commercially reasonable terms, that our counterparties will perform their obligations, or that these agreements, if entered into, will protect us fully against our interest rate risk.

37. Our Promoters have provided their personal guarantees and our subsidiary has provided Corporate Guarantee as security against borrowing made by our Company. Our business, financial condition, results of operations, cash flows and prospects may be affected by the invocation of all or any personal guarantees and property mortgage by our Promoter.

Our Promoters Mr. Rajinder Kaul, Mr. Ravinder Bhan, Mr. Arun Kaul, and our Promoter Group members Mrs. Mukta Mani Kaul and Ms. Hansa Kaul has provided their personal guarantees and our subsidiary Sharika Lightec Pvt. Ltd. have provided Corporate Guarantee against the working capital limit from The Jammu and Kashmir Bank Limited and India bulls Commercial Credit Limited. Also personal property of Our Promoter Mr. Rajinder Kaul and his relative has provided their personal property against loan from The Jammu and Kashmir Bank Limited. In case of a default under our loan agreements, and personal guarantees and Personal property provided by our Promoters, promoter group and subsidiary may be invoked, which could negatively impact the networth of the Promoters, promoter group and subsidiary. Accordingly, we may face certain impediments in taking decisions in relation to our Company, which in turn would result in a material effect on our financial condition, business, results of operations and prospects and would impact our business. We may also not be successful in procuring alternate guarantees satisfactory to banks, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of working capital, which could affect our financial condition and cash flows.

For detail description of properties charged, Please refer chapter titled “Statement of Financial Indebtedness” beginning on page 206 of this Draft Prospectus.

38. We are subject to the risk of failure of, or a material weakness in, our internal control systems.

We are exposed to risks arising from the inadequacy or failure of internal systems or processes, and any actions we may take to mitigate these risks may not be sufficient to ensure an effective internal control environment. Given our high volume of transactions, errors may be repeated or compounded before they are discovered and rectified. Our management information systems and internal control procedures may not be able to identify non-compliance or suspicious transactions in a timely manner, or at all. Where internal control weaknesses are identified, our actions may not be sufficient to fully correct such weaknesses. As a result, we may incur expenses or suffer monetary losses, which may not be covered by our insurance policies and may result in a material effect on our business, financial condition and results of operations.

39. Our actual results could differ from the estimates and projections used to prepare our financial statements.

The estimates and projections are based on and reflect our current expectations, assumptions and/ or projections as well as our perception of historical trends and current conditions, as well as other factors that we believe are appropriate and reasonable under the circumstances. There can be no assurance that our expectations, estimates, assumptions and/or projections, including with

respect to the future earnings and performance will prove to be correct or that any of our expectations, estimates or projections will be achieved.

40. In addition to normal remuneration, other benefits and reimbursement of expenses some of our Directors are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.

Some of our Directors are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. We cannot assure you that our Directors would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Directors will always act to resolve any conflicts of interest in our favour, thereby affecting our business and results of operations and prospects.

41. Our Company has entered in partnership with High Tension Erectors Limited for providing services of laying electric cables in the year 2009. Any liabilities arises in future for such association will impact our business.

Our Company has entered in partnership with High Tension Erectors Limited in the name and style of “High Tension Associates” dated August 18, 2009 for providing services of laying electric cables. Any liability arises in future for such association will impact the business of our Company. Further in the year 2015-16, our Company has disassociated from the captioned partnership but the dissolution deed has not been executed for the same. Any litigation and liability arises in the future may impact business and financial position of the Company.

42. Our insurance coverage may not be adequate to protect us against all potential losses to which we may be subject and this may have a material effect on our business and financial condition.

While we maintain insurance coverage, in amounts which we believe are commercially appropriate, including related to our registered office, corporate office and our movable property, which provide appropriate coverage in relation to fire, explosions, floods, inundations, earthquakes, landslides we may not have sufficient insurance coverage to cover all possible economic losses, including when the loss suffered is not easily quantifiable and in the event of severe damage to our business. Even if we have made a claim under an existing insurance policy, we may not be able to successfully assert our claim for any liability or loss under such insurance policy. Additionally, there may be various other risks and losses for which we are not insured either because such risks are uninsurable or not insurable on commercially acceptable terms. The occurrence of an event for which we are not adequately or sufficiently insured could have an effect on our business, results of operations, financial condition and cash flows.

In addition, in the future, we may not be able to maintain insurance of the types or at levels which we deem necessary or adequate or at rates which we consider reasonable. The occurrence of an event for which we are not adequately or sufficiently insured or the successful assertion of one or more large claims against us that exceed available insurance coverage, or changes in our insurance policies (including premium increases or the imposition of large deductible or co-insurance requirements), could have an effect on our business, results of operations, financial condition and cash flows.

For further details of our Insurance Policies, please refer section titled “Our Business” beginning on Page 93 of this Draft Prospectus.

43. We have not independently verified certain data in this Draft Prospectus.

We have not independently verified data from the Industry and related data contained in this Draft Prospectus and although we believe the sources mentioned in the report to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and

should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

44. Our Company's management will have flexibility in utilizing the Net Proceeds from the Issue. The deployment of the Net Proceeds from the Issue is not subject to any monitoring by any independent agency.

Our Company intends to primarily use the Net Proceeds towards working capital requirement and for general corporate purposes as described in "Objects of the Issue" on page 71 of this Draft Prospectus. In terms of Regulation 16 of the SEBI (ICDR) Regulations, we are not required to appoint a monitoring agency since the Issue size is not in excess of ₹100 crores. The management of our Company will have discretion to use the Net Proceeds from the Issue, and investors will be relying on the judgment of our Company's management regarding the application of the Net Proceeds from the Issue. Our Company may have to revise its management estimates from time to time and consequently its requirements may change.

Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the Shareholders and our Promoters or controlling Shareholders will be required to provide an exit opportunity to the Shareholders of our Company who do not agree to such proposal to vary the objects, in such manner as may be prescribed in future by the SEBI.

Accordingly, prospective investors in the Issue will need to rely upon our management's judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for utilization of Net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the Issue and our business and financial results may suffer.

45. We have not identified any alternate source of raising the working capital mentioned as our 'Objects of the Issue'. Any shortfall in raising / meeting the same could affect our growth plans, operations and financial performance.

Our Company has not identified any alternate source of funding for our working capital requirement and for general corporate purposes and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of working capital or may require our Company to borrow funds on unfavorable terms, both of which scenarios may affect the business operation and financial performance of the Company.

46. We face foreign exchange risks that could affect our results of operations.

We face foreign exchange rate risk to the extent that certain of our goods imported from outside India. Because of our foreign currency exposures, exchange rate fluctuations between the Indian Rupee and foreign currencies, especially the U.S. dollar, can have a material impact on our results of operations, cash flows and financial condition. The exchange rate between the Indian Rupee and U.S. dollar has been volatile in recent periods and may continue to fluctuate in the future.

Fluctuations in the exchange rates may affect us to the extent of such orders being placed overseas. Our Company may enter into certain contracts to hedge exchange rate fluctuations which may or may not adequately cover the potential loss that may arise as a result of such foreign exchange transactions. Moreover, these hedges do not cover all such exposures and are in any event subject to their own risks, including counterparty credit risk. Adverse moves in exchange rates that we have not adequately hedged may impact our profitability and financial condition.

For further details of our financial statements, please refer to the chapter titled "Financial Information of the Company" on page 143 of this Draft Prospectus.

47. Our business operations may be materially affected by strikes, work stoppages or increased wage demands by our employees.

As of May 31, 2017, we had 62 full-time employees on our rolls. Although we have not experienced any major disruptions to our business operations due to any labour disputes or other problems with our work force in the past, there can be no assurance that we will not experience such disruptions in the future. Such disruptions may affect our business, and results of operations and may also divert the management's attention and result in increased costs. India has stringent labour legislations that protect the interests of workers, including legislations that set forth detailed procedures for the establishment of trade unions, dispute resolution and employee removal and legislations that impose certain financial obligations on employers upon retrenchment. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees

unionize, it may become difficult for us to maintain flexible labour policies, and we may face the threat of labour unrest, demand for increase in wages, work stoppages, which may lead to diversion of our management's attention due to union intervention, which may have a material impact on our business, results of operations and financial condition.

We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Shortage of skilled personnel or work stoppages caused by disagreements with employees could have an effect on our business and results of operations. For more details of our Employees, please see the section entitled "Our Business – Human Resource" on page 93 of the Draft Prospectus.

48. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Issue, there has been no public market for our Equity Shares, and an active trading market may not develop or be sustained upon the completion of this Issue. The market price of our Equity Shares after this Issue will be subject to significant fluctuations in response to, among other factors:

- Variations in our operating results and the performance of our business;
- Regulatory developments in our target markets affecting us, our customers or our competitors;
- Changes in financial estimates by securities research analysts;
- Addition or loss of executive officers or key employees;
- Loss of one or more significant customers;
- The performance of the Indian and global economy;
- Significant developments in India's economic liberalization and deregulation policies, and the fiscal regime;
- Volatility in the Indian and global securities markets;
- Performance of our competitors and perception in the Indian market about investment in the power sector; and
- Adverse media reports, if any, on our Company, or the Indian power sector.

Many of these factors are beyond our control. There has been recent volatility in the Indian stock markets and our share price could fluctuate significantly as a result of such volatility in the future. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue.

49. We have in the last 12 months issued Equity Shares at a price that may be at lower than the Issue Price.

In the last 12 months we may have issued fresh Equity Shares to the promoters and other shareholders of our Company which are as follows:-

- Bonus issue in the ratio of 75:1 dated August 08, 2017 issuing 75,00,000 Equity shares face value ₹ 10/- per Equity Share for consideration other than cash.

The Equity Shares allotted to investors pursuant to this Issue is being priced significantly higher due to various reasons including better performance by the Company, better economic conditions and passage of time.

For Further details of equity shares issued, please refer to the chapter titled "Capital Structure" beginning on page 58 of the Draft Prospectus.

50. Conditions in and volatility of the Indian securities market may affect the price or liquidity of our Equity Shares.

The Indian securities markets are smaller than securities markets in more developed economies. Indian stock exchanges have in the past experienced substantial fluctuations in the prices of listed securities. Further, the Indian stock exchanges have often experienced periods of significant volatility in the last few years. The Indian stock exchanges have also experienced problems that have affected the market price and liquidity of securities, such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. If similar problems occur in the future, the market price and liquidity of our Equity Shares could be affected.

51. Any future issuance of Equity Shares may dilute the investors' shareholdings or sales of our Equity Shares by our Promoters or Promoter Group may affect the trading price of our Equity Shares.

Any future equity issuances by us or sales of our Equity Shares by our Promoters or Promoter Group may affect the trading price of our Equity Shares and our Company's ability to raise capital through an issue of securities. In addition, any perception by potential investors that such issuances or sales might occur could also affect the trading price of our Equity Shares. Additionally, the disposal, pledge or encumbrance of our Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of our Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

52. The investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws, capital gains arising from the sale of Equity Shares within 12 months in an Indian company are generally taxable in India. Any gain realised on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if Securities Transaction Tax ("STT") has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Any gain realised on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident.

Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of our Equity Shares.

53. The investors may be restricted in their ability to exercise pre-emptive rights under Indian law and may be affected by future dilution of their ownership position.

Under the Companies Act, 2013, a company incorporated in India must offer its holders of shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages before the issuance of any new shares, unless the pre-emptive rights have been waived by adoption of a special resolution by holders of three-fourths of the shares which are voted on the resolution. However, if the law of the jurisdiction the investors does not permit them to exercise their pre-emptive rights without us filing an offering document or registration statement with the applicable authority in the jurisdiction they are in, they will be not be able to exercise their pre-emptive rights unless we make such a filing. If we elect not to make such a filing, the new securities may be issued to a custodian, who may sell the securities for the investors' benefit. The value such custodian would receive upon the sale of such securities, if any, and the related transaction costs cannot be predicted. To the extent that the investors' are unable to exercise pre-emptive rights granted in respect of the Equity Shares, their proportional interest in us would be reduced.

54. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we are not permitted to declare any dividends, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see "Dividend Policy" on page 142 of this Draft Prospectus.

55. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities may differ from those that would apply to a company in another jurisdiction. Investors may have more difficulty in asserting their rights as shareholders in an Indian

company than as shareholder of a corporation in another jurisdiction. Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other jurisdictions. Under the Companies Act, prior to issuance of any new equity shares, a public limited company incorporated under Indian law must offer its equity shareholders pre-emptive rights to subscribe to a proportionate number of equity shares to maintain existing ownership, unless such preemptive rights are waived by a special resolution by a three-fourths majority of the equity shareholders voting on such resolution. If you are a foreign investor and the law of the foreign jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such foreign jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file an offering document or a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interest in our Company would decline.

56. A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Such provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of us. Under the takeover regulations in India, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the Indian takeover regulations.

57. The average cost of acquisition of Equity Shares by our Promoters could be lower than the Issue Price.

Our Promoters average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price as may be decided by the Company, in consultation with the LM. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapters "Capital Structure" beginning on page 58 of this Draft Prospectus.

58. We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure and any future equity offerings by us.

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the IPO Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favourable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt to equity ratio to increase or require us to create charges or liens on our assets in favour of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any future issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company's Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company's Equity Shares. Additionally the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception

that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

EXTERNAL RISK FACTORS

59. Political, economic or other factors that are beyond our control may have an adverse impact on our business and results of operations.

Our performance and growth are dependent on the health of the Indian economy. Any slowdown in the Indian economy could materially and adversely impact our business, our results of operations and our financial condition. The following external risks may have an adverse impact on our business and results of operations should any of them materialize:

- Political instability, resulting from a change in the government or a change in the economic and deregulation policies may adversely affect economic conditions in India in general and our business in particular;
- A change in government policy towards controlling the power sector in India, including any decision to further open the sector to private sector competition;
- A slowdown in economic growth in India may adversely affect the demand for power and consequently our business and results of operations. The growth of our business and our financial performance is linked to the performance of the overall Indian economy;
- Civil unrest, acts of violence, terrorist attacks, regional conflicts of situations or war involving India, or other countries may adversely affect the financial markets which may impact our business. Such incidents may impact economic growth or create a perception that investment in Indian companies involves a higher degree in risk which may reduce the value of the Equity Shares;
- Natural disasters in India may disrupt or adversely affect the Indian economy, on the health of which our business depends.
- Any downgrading of India's sovereign rating by international credit rating agencies may negatively impact our business, credit ratings and access to capital. In such an event, our ability to grow our business and operate profitably may be severely constrained; and
- Instances of corruption in India have the potential to discourage investors and derail the growth prospects of the Indian economy. Corruption creates economic and regulatory uncertainty and may have an adverse effect on our business, profitability and results of operations.

The Indian economy has sustained periods of high inflation. Should inflation continue to increase sharply, our profitability and results of operations may be adversely impacted. High rates of inflation in India may increase our employee costs, decrease the disposable income available to our customers and decrease our operating margins, which may have an adverse effect on our profitability and results of operations.

60. Terrorist attacks or war or conflicts involving India or other countries could adversely affect business sentiment and the financial markets and adversely affect our business.

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets in which our Equity Shares will trade and also adversely affect the worldwide financial markets. Further we operate in international locations where there may be high security risks, which could result in harm to our employees or unanticipated cost. Such factors may also result in a loss of business confidence, make travel and other services more difficult and ultimately adversely affect our business. In addition, any deterioration in the relations between India and its neighbouring countries might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares.

India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

61. Changing laws, rules and regulations and legal uncertainties may adversely affect our business and financial performance.

Our business and financial performance could be affected by changes in law or regulatory environment, or interpretations of existing laws, rules and regulations, or the promulgation of new laws, rules and regulations in India, applicable to us and our

business. Any significant changes in relevant regulations, laws or regulatory environment might materially impact the Company's operations and financials.

Additionally, the regulatory environment in which we operate is subject to change both in the form of gradual evolution over time and also in form of significant reforms from time to time. For instance, a recent notification issued by the Government of India withdrawing the legal tender status of currency notes of ₹500 and ₹1,000, may have had and may continue to have an adverse effect on certain sectors of the Indian economy. Further, the General Anti Avoidance Rules ("GAAR") are effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefits among other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us. Any such change in the future may require us to commit significant management resources and may require significant changes to our business practices and could have a material adverse effect on our business, financial condition, results of operations and prospects.

The governmental and regulatory bodies in India may notify new regulations and/or policies, which may require us to obtain approvals and licenses from the government and other regulatory bodies, or impose onerous requirements and conditions on our operations, in addition to those which we are undertaking currently. Any such changes and the related uncertainties with respect to the implementation of new regulations may have a material adverse effect on our business, financial condition and results of operations.

In addition, there have been various changes and proposed changes recently in the laws and regulations relating to information technology in India. Any such changes could require us to redesign our information technology systems or redesign our digital processes to comply with such laws and regulations. We cannot assure you that we will be able to redesign such systems or processes in a cost-effective manner, or at all. Since our business depends heavily on the ability of our information technology systems and digital processes, any change in the laws or regulations relating to information technology in India could have a material adverse effect on our business, financial condition, results of operations and prospects.

62. We may be affected by competition law in India and any adverse application or interpretation of the Competition Act could affect our business.

The Competition Act was enacted for the purpose of preventing practices that have or are likely to have an effect on competition in India and has mandated the CCI to separate such practices. Under the Competition Act, any arrangement, understanding or action, whether formal or informal, which causes or is likely to cause an appreciable adverse effect on competition is void and attracts substantial penalties.

Further, any agreement among competitors which, directly or indirectly, involves determination of purchase or sale prices, limits or controls production, or shares the market by way of geographical area or number of subscribers in the relevant market is presumed to have an appreciable adverse effect in the relevant market in India and shall be void. The Competition Act also prohibits abuse of a dominant position by any enterprise. On March 4, 2011, the Indian central government notified and brought into force the combination regulation (merger control) provisions under the Competition Act with effect from June 1, 2011. These provisions require acquisitions of shares, voting rights, assets or control or mergers or amalgamations that cross the prescribed asset and turnover based thresholds to be mandatorily notified to, and pre-approved by, the CCI. Additionally, on May 11, 2011, the CCI issued the Competition Commission of India (Procedure for Transaction of Business Relating to Combinations) Regulations, 2011, as amended, which sets out the mechanism for implementation of the merger control regime in India.

The Competition Act aims to, among other things, prohibit all agreements and transactions which may have an appreciable adverse effect in India. Consequently, all agreements entered into by us could be within the purview of the Competition Act. Further, the CCI has extra-territorial powers and can investigate any agreements, abusive conduct or combination occurring outside of India if such agreement, conduct or combination has an appreciable adverse effect in India. However, the impact of the provisions of the Competition Act on the agreements entered into by us cannot be predicted with certainty at this stage. We are not currently party to any outstanding proceedings, nor have we received notice in relation to non-compliance with the Competition Act or the agreements entered into by us. However, if we are affected, directly or indirectly, by the application or interpretation of any provision of the Competition Act, or any enforcement proceedings initiated by the CCI, or any adverse publicity that may be generated due to scrutiny or prosecution by the CCI or if any prohibition or substantial penalties are levied under the Competition Act, it would affect our business, financial condition, results of operations and prospects.

63. Political, economic or other factors that are beyond our control may have an effect on our business, results of operations and cash flows.

We currently manufacture only in India and are dependent on domestic, regional and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent on the agriculture of the Indian economy. There have been periods of slowdown in the economic growth of India. Demand for our products may be adversely affected by an economic downturn in domestic, regional and global economies. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, cash flows and financial condition. Also, a change in the Government or a change in the economic and deregulation policies could affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

64. The Government of India had recently certain currency demonetization measures, which may affect the Indian economy and our business, results of operations, financial condition and prospects.

On November 8, 2016, the RBI and the Ministry of Finance of the GoI withdrew the legal tender status of ₹500 and ₹ 1,000 currency notes pursuant to notification dated November 8, 2016. The short-term impact of these developments has been, among other things, a decrease in liquidity of cash in India. There is uncertainty on the medium- and long-term impact of this action. The medium- and long-term effects of demonetization on the Indian economy and our business are uncertain and we cannot accurately predict its effect on our business, results of operations, financial condition and prospects.

65. The occurrence of natural or man-made disasters could adversely affect our results of operations and financial condition.

The occurrence of natural disasters, including hurricanes, floods, earthquakes, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations or financial condition, including in the following respects:

Catastrophic loss of life due to natural or man-made disasters could cause us to pay benefits at higher levels and/or materially earlier than anticipated and could lead to unexpected changes in persistency rates. SECTION III – INTRODUCTION

SUMMARY OF OUR INDUSTRY

GLOBAL OUTLOOK

Global growth is firming, contributing to an improvement in confidence. A recovery in industrial activity has coincided with a pickup in global trade, after two years of marked weakness. In emerging market and developing economies (EMDEs), obstacles to growth among commodity exporters are gradually diminishing, while activity in commodity importers remains generally robust. As a result, and despite substantial policy uncertainty, global growth is projected to accelerate to 2.7 percent in 2017, up from a post-crisis low of 2.4 percent in 2016, before strengthening further to 2.9 percent in 2018-19, broadly in line with January projections.

Activity in advanced economies is expected to gain momentum in 2017, supported by an upturn in the United States, as previously anticipated. In the Euro Area and Japan, growth forecasts have been upgraded, reflecting strengthening domestic demand and exports. Investment across advanced economies has firmed, while private consumption growth has moderated. As actual growth continues to exceed potential growth, increasing inflation and narrowing output gaps have raised the prospects of less accommodative monetary policy. Advanced economy growth is expected to accelerate to 1.9 percent in 2017, before moderating gradually in 2018-19. As usual, the outlook is predicated only on legislated fiscal and trade policies.

The recovery in global trade coincides with strengthening investment, which is more import intensive than other components of aggregate demand. Nevertheless, structural headwinds, including slower trade liberalization and value chain integration, as well as elevated policy uncertainty, continue to weigh on the outlook for trade.

Global financing conditions have been benign and benefited from improving market expectations about growth prospects. Financial market volatility has been low despite elevated policy uncertainty, reflecting investor risk appetite and, perhaps, some level of market complacency. Renewed risk appetite has supported EMDE financial markets and led to a narrowing of corporate bond spreads globally. Capital inflows to EMDEs were robust in the first half of 2017, partly in a rebound from late-2016 weakness. Over time, however, a gradual tightening of international financing conditions may weigh on capital flows to EMDEs. Commodity prices have continued to rise moderately, although prospects for increased U.S. shale oil production are weighing on the outlook for oil prices.

Against an improving international backdrop, growth in EMDEs has strengthened from a post crisis low of 3.5 percent in 2016. It is projected to reach 4.1 percent in 2017 and 4.5 percent in 2018. In commodity exporters, firming commodity prices, recovering industrial activity, stabilizing investment, and improving confidence are supporting a gradual recovery, following near stagnation in the past couple of years. This recovery will be broad-based, impacting nearly 70 percent of commodity exporters in 2017. However, lingering fiscal and external adjustment needs dampen growth prospects in a number of countries. As a result, growth in commodity exporters is projected to rise from 0.4 percent in 2016 to 1.8 percent in 2017 and 2.7 percent in 2018—somewhat below January forecasts, reflecting longer-than-expected adjustment to low commodity prices in some countries and, to a lesser degree, slightly lower oil price projections.

Growth continues to be robust among commodity importers. Windfalls from the recent decline in commodity prices is waning, but accommodative policies are supporting domestic demand and export growth is being bolstered by a recovery in global trade. The forecast for growth in commodity importers remains stable, at an average of 5.7 percent in 2017-19.

In low-income countries, growth is rebounding, as rising metals prices lift production in metals exporters and infrastructure investment continues in non-resource-intensive economies. However, some low-income countries are still struggling with declining oil production, conflict, drought, and security and political challenges. Growth in low-income countries is expected to strengthen during 2017-19, as activity firms in commodity exporters.

A number of factors weigh on longer-term EMDE growth prospects, including structural headwinds to global trade, worsening demographics, slowing productivity growth, and governance and institutional challenges. Even if the expected modest rebound in investment across EMDEs materializes, slowing capital accumulation in recent years may already have reduced potential growth. Substantial risks cloud this outlook, despite the possibility of fiscal stimulus in some major advanced economies, particularly the United States. Escalating trade restrictions could derail a fragile recovery in trade and undo gains from past liberalization efforts. A further increase in policy uncertainty from already high levels could dampen confidence and investment and trigger financial market stress, after a period of unusually low financial market volatility. Market reassessment of advanced-economy monetary policy, or

disorderly exchange rate developments, could contribute to swings in EMDE asset prices and capital flows, potentially amplified by vulnerabilities in some countries. Over the longer term, persistent weakness in productivity and investment growth would erode potential growth.

Policymakers face the challenge in nurturing the recovery, confronting downside risks, and fostering longer-term growth. Central banks in advanced economies will gradually normalize monetary policy as inflation increases and economic slack diminishes. While the U.S. tightening cycle is well ahead of other major advanced economies, it is proceeding at a substantially slower pace than in the past. Expansionary fiscal policy could help support the recovery, as long as it is consistent with medium term fiscal sustainability. Policy priorities include measures to support workers most affected by sectoral shifts in employment through better training and job search programs, and to share the dividends of growth and gains from globalization more widely.

Inflation rates in EMDE commodity exporters and importers are converging. Easing inflation among commodity exporters since mid-2016 has allowed a more accommodative monetary policy stance in some countries. Although the impact of the earlier drop in commodity prices on the government budgets of commodity exporters is dissipating, fiscal space remains constrained in many EMDEs, suggesting the need for continued fiscal adjustment. EMDEs will need to continue to pursue structural reforms to improve their longer term growth prospects, diversify their economies, and develop domestic as well as foreign markets. These efforts include policies to improve the business climate, support investment in human and physical capital, and enhance regional and global trade integration of EMDEs.

INDIAN ECONOMY OVERVIEW

Economic growth is projected to remain strong and India will remain the fastest-growing G20 economy. The increase in public wages and pensions will support consumption. Private investment will recover gradually as excess capacity diminishes, and the landmark Goods and Services Tax and other measures to improve the ease of doing business are being implemented. However, large non-performing loans and high leverage of some companies are holding back investment.

Monetary policy is projected to remain tight as inflation expectations have still not fully adjusted down. The need to reduce the relatively high public-debt-to-GDP ratio leaves little room for fiscal stimulus. However, investing more in physical and social infrastructure is critical to raising living standards for all. This should be financed by a comprehensive reform of income and property taxes. Restoring credit discipline and cleaning up banks' balance sheets will be instrumental to support the credit growth needed to finance more business investment.

Trade openness has increased, partly driven by a competitive service sector. Manufacturing has lagged behind, with limited contribution to exports and job creation, leaving many workers in low-paid jobs. Promoting quality job creation in manufacturing would require reducing further restrictions on FDI and trade, modernising labour regulations and providing better education and skills. Better infrastructure, transport and logistic services would facilitate manufacturing firms' access to global markets, particularly from remote and poorer regions.

POWER SECTOR INDIA

Power is one of the most critical components of infrastructure crucial for the economic growth and welfare of nations. The existence and development of adequate infrastructure is essential for sustained growth of the Indian economy.

India's power sector is one of the most diversified in the world. Sources of power generation range from conventional sources such as coal, lignite, natural gas, oil, hydro and nuclear power to viable non-conventional sources such as wind, solar, and agricultural and domestic waste. Electricity demand in the country has increased rapidly and is expected to rise further in the years to come. In order to meet the increasing demand for electricity in the country, massive addition to the installed generating capacity is required.

India ranks third among 40 countries in EY's Renewable Energy Country Attractiveness Index, on back of strong focus by the government on promoting renewable energy and implementation of projects in a time bound manner.

India has moved up 73 spots to rank 26th in the World Bank's list of electricity accessibility in 2017, according to Mr Piyush Goyal, Minister of State (Independent Charge) for Power, Coal, Renewable Energy and Mines, Government of India.

Market Size

Indian power sector is undergoing a significant change that has redefined the industry outlook. Sustained economic growth continues to drive electricity demand in India. The Government of India's focus on attaining 'Power for all' has accelerated capacity addition in the country. At the same time, the competitive intensity is increasing at both the market and supply sides (fuel, logistics, finances, and manpower).

Total installed capacity of power stations in India stood at 330,260.53 Megawatt (MW) as on May, 2017.

The Ministry of Power has set a target of 1,229.4 billion units (BU) of electricity to be generated in the financial year 2017-18, which is 50 BU's higher than the target for 2016-17. The annual growth rate in renewable energy generation has been estimated to be 27 per cent and 18 per cent for conventional energy.

The Government has added 10.2 Giga Watts (GW) of conventional energy generation capacity and 12.5 GW of renewable energy capacity in Financial Year 2017

Under the 12th Five Year Plan, the Government has added 93.5 GW of power generation capacity, thereby surpassing its target of 88.5 GW during the period.

The Road Ahead

The Indian power sector has an investment potential of Rs 15 trillion (US\$ 225 billion) in the next 4–5 years, thereby providing immense opportunities in power generation, distribution, transmission, and equipment, according to Union Minister Mr Piyush Goyal.

The government's immediate goal is to generate two trillion units (kilowatt hours) of energy by 2019. This means doubling the current production capacity to provide 24x7 electricity for residential, industrial, commercial and agriculture use.

The government has electrified 13,000 villages so far out of the total 18,452 villages and is targeting electrification of all villages by 2019, within the targeted 1,000 days.

The Government of India is taking a number of steps and initiatives like 10-year tax exemption for solar energy projects, etc., in order to achieve India's ambitious renewable energy targets of adding 175 GW of renewable energy, including addition of 100 GW of solar power, by the year 2022. The government has also sought to restart the stalled hydro power projects and increase the wind energy production target to 60 GW by 2022 from the current 20 GW.

GLOBAL OUTLOOK

Global growth is firming, contributing to an improvement in confidence. A recovery in industrial activity has coincided with a pickup in global trade, after two years of marked weakness. In emerging market and developing economies (EMDEs), obstacles to growth among commodity exporters are gradually diminishing, while activity in commodity importers remains generally robust. As a result, and despite substantial policy uncertainty, global growth is projected to accelerate to 2.7 percent in 2017, up from a post-crisis low of 2.4 percent in 2016, before strengthening further to 2.9 percent in 2018-19, broadly in line with January projections.

Activity in advanced economies is expected to gain momentum in 2017, supported by an upturn in the United States, as previously anticipated. In the Euro Area and Japan, growth forecasts have been upgraded, reflecting strengthening domestic demand and exports. Investment across advanced economies has firmed, while private consumption growth has moderated. As actual growth continues to exceed potential growth, increasing inflation and narrowing output gaps have raised the prospects of less accommodative monetary policy. Advanced economy growth is expected to accelerate to 1.9 percent in 2017, before moderating gradually in 2018-19. As usual, the outlook is predicated only on legislated fiscal and trade policies.

The recovery in global trade coincides with strengthening investment, which is more import intensive than other components of aggregate demand. Nevertheless, structural headwinds, including slower trade liberalization and value chain integration, as well as elevated policy uncertainty, continue to weigh on the outlook for trade.

Global financing conditions have been benign and benefited from improving market expectations about growth prospects. Financial market volatility has been low despite elevated policy uncertainty, reflecting investor risk appetite and, perhaps, some level of market complacency. Renewed risk appetite has supported EMDE financial markets and led to a narrowing of corporate bond spreads globally. Capital inflows to EMDEs were robust in the first half of 2017, partly in a rebound from late-2016 weakness. Over time, however, a gradual tightening of international financing conditions may weigh on capital flows to EMDEs. Commodity prices have continued to rise moderately, although prospects for increased U.S. shale oil production are weighing on the outlook for oil prices.

Against an improving international backdrop, growth in EMDEs has strengthened from a post crisis low of 3.5 percent in 2016. It is projected to reach 4.1 percent in 2017 and 4.5 percent in 2018. In commodity exporters, firming commodity prices, recovering industrial activity, stabilizing investment, and improving confidence are supporting a gradual recovery, following near stagnation in the past couple of years. This recovery will be broad-based, impacting nearly 70 percent of commodity exporters in 2017. However, lingering fiscal and external adjustment needs dampen growth prospects in a number of countries. As a result, growth in commodity exporters is projected to rise from 0.4 percent in 2016 to 1.8 percent in 2017 and 2.7 percent in 2018—somewhat below January forecasts, reflecting longer-than-expected adjustment to low commodity prices in some countries and, to a lesser degree, slightly lower oil price projections.

Growth continues to be robust among commodity importers. Windfalls from the recent decline in commodity prices is waning, but accommodative policies are supporting domestic demand and export growth is being bolstered by a recovery in global trade. The forecast for growth in commodity importers remains stable, at an average of 5.7 percent in 2017-19.

In low-income countries, growth is rebounding, as rising metals prices lift production in metals exporters and infrastructure investment continues in non-resource-intensive economies. However, some low-income countries are still struggling with declining oil production, conflict, drought, and security and political challenges. Growth in low-income countries is expected to strengthen during 2017-19, as activity firms in commodity exporters.

A number of factors weigh on longer-term EMDE growth prospects, including structural headwinds to global trade, worsening demographics, slowing productivity growth, and governance and institutional challenges. Even if the expected modest rebound in investment across EMDEs materializes, slowing capital accumulation in recent years may already have reduced potential growth. Substantial risks cloud this outlook, despite the possibility of fiscal stimulus in some major advanced economies, particularly the United States. Escalating trade restrictions could derail a fragile recovery in trade and undo gains from past liberalization efforts. A further increase in policy uncertainty from already high levels could dampen confidence and investment and trigger financial market stress, after a period of unusually low financial market volatility. Market reassessment of advanced-economy monetary policy, or disorderly exchange rate developments, could contribute to swings in EMDE asset prices and capital flows, potentially amplified by vulnerabilities in some countries. Over the longer term, persistent weakness in productivity and investment growth would erode potential growth.

Policymakers face the challenge in nurturing the recovery, confronting downside risks, and fostering longer-term growth. Central banks in advanced economies will gradually normalize monetary policy as inflation increases and economic slack diminishes. While the U.S. tightening cycle is well ahead of other major advanced economies, it is proceeding at a substantially slower pace than in the past. Expansionary fiscal policy could help support the recovery, as long as it is consistent with medium term fiscal sustainability. Policy priorities include measures to support workers most affected by sectoral shifts in employment through better training and job search programs, and to share the dividends of growth and gains from globalization more widely.

Inflation rates in EMDE commodity exporters and importers are converging. Easing inflation among commodity exporters since mid-2016 has allowed a more accommodative monetary policy stance in some countries. Although the impact of the earlier drop in commodity prices on the government budgets of commodity exporters is dissipating, fiscal space remains constrained in many EMDEs, suggesting the need for continued fiscal adjustment. EMDEs will need to continue to pursue structural reforms to improve their longer term growth prospects, diversify their economies, and develop domestic as well as foreign markets. These efforts include policies to improve the business climate, support investment in human and physical capital, and enhance regional and global trade integration of EMDEs.

Global trends

Global trade has strengthened in 2017, as manufacturing activity firmed and investment growth bottomed out, especially in advanced economies. Appetite for EMDE assets has returned, reflecting market expectations of strengthening growth and still favorable international financing conditions. Moderate increases in commodity prices are expected to continue, although oil price projections have been revised slightly down, reflecting the prospect of increased U.S. shale oil production.

Global trade

Global trade growth has rebounded from a post crisis low of 2.5 percent in 2016, despite rising trade policy uncertainty. The recovery, which began in the second half of 2016, has been supported by stronger industrial activity. Just as a slowdown in global investment growth was an important factor behind the deceleration of global goods trade, strengthening investment may support trade in 2017 (Freund 2016; Boz et al. 2015; Bussière et al. 2013; World Bank 2015a). Investment growth in advanced economies is firming, and the post-crisis deceleration in capital spending observed in EMDEs appears to be easing as the earlier terms-of-trade shock for commodity exporters wanes. A recovery in goods trade is supporting an upturn in China's exports, which in turn boosts imports of intermediate products across regional and global value chains. Policy-induced infrastructure spending in China has also supported demand for industrial commodities, benefiting countries exporting raw materials.

Services trade was resilient throughout 2016, supported by robust global consumer spending, particularly in major advanced economies. The ongoing recovery in goods trade may also boost services exports embodied in traded products (Lanz and Maurer 2015). Overall, trade in services continues to play a stabilizing role, being less volatile and pro-cyclical than goods trade (Borchert and Mattoo 2009; Ariu 2016; World Bank 2016a).

Global trade growth is expected to rebound to 4 percent in 2017, a faster pace than previously forecast. The recovery in trade growth in 2017 is supported by stronger import demand from major advanced economies, increased trade flows to and from China, and a diminished drag from weak import demand from commodity exporting EMDEs. Nevertheless, trade growth will continue to be held back by structural impediments, such as maturing global value chains and a slower pace of trade liberalization (World Bank 2015a; ECB 2016).

Protectionist measures do not appear to have been a significant factor behind weak trade since the global financial crisis. According to the WTO, the number of new trade restrictions in 2016 was broadly in line with previous years. And although the use of non-tariff restrictions appears to have increased recently (Evenett and Fritz 2016), their dampening effect has been limited so far (Ghodsi, Jokubauskaite, and Stehrer 2015). Nevertheless, an expanding stock of restrictions and growing uncertainty about the direction of trade policy in some major economies could at some point have a material negative impact.

B. Global imports and investment

C. Import intensity of demand components, 2014

Financial markets

Global financing conditions have been benign since the start of 2017. Shortly after the U.S. elections of November 2016, U.S. long-term yields rose sharply, similar to their surge during the mid-2013 Taper Tantrum. Unlike the Taper Tantrum, the late-2016 increase reflected market expectations of strengthening growth and higher inflation in the United States, and was not accompanied by a sudden and sustained re-pricing of risk, including of emerging market assets. Since early 2017, U.S. long-term yields have plateaued, even as the Federal Reserve has continued to raise short-term rates.

Euro Area bond yields have remained exceptionally low, supported by continued monetary policy accommodation by the ECB (Mojon 2017). The decoupling of Euro Area and U.S. long term yields is expected to help maintain low global interest rates, even as the Federal Reserve pursues policy normalization. In some Euro Area countries, however, upcoming political events and renewed banking sector concerns have contributed to a rise in risk premiums (De Santis 2017).

In an environment characterized by low market volatility and robust investor risk appetite, emerging market bond spreads have narrowed and equity prices have recovered. This provides another sharp contrast with the Taper Tantrum, which was accompanied by a substantial deterioration in financing conditions for EMDEs. Bond spreads have narrowed most notably among commodity exporters, while their currencies have generally regained ground. Overall, capital inflows to EMDEs have been robust in the first half of 2017, with EMDE bond issuance activity increasing at a record pace. Corporate bond issuance has been particularly buoyant, notably in Latin America, as companies aimed at extending maturity and lowering interest costs. Amid rising fiscal deficits, the Middle East and North Africa region has accounted for about half of total EMDE sovereign bond issuances since the start of 2017. Fewer credit downgrades and improving growth prospects have supported a recovery in capital flows to some commodity-exporting EMDEs, despite continued weak FDI in resource sectors. Capital flows are expected to remain steady in 2017 and 2018, reflecting the offsetting effects of gradually tighter international financing conditions and strengthening growth prospects in EMDEs (Eichengreen, Gupta, and Masetti 2017).

INDIAN ECONOMY OVERVIEW

Economic growth is projected to remain strong and India will remain the fastest-growing G20 economy. The increase in public wages and pensions will support consumption. Private investment will recover gradually as excess capacity diminishes, and the landmark Goods and Services Tax and other measures to improve the ease of doing business are being implemented. However, large non-performing loans and high leverage of some companies are holding back investment.

Monetary policy is projected to remain tight as inflation expectations have still not fully adjusted down. The need to reduce the relatively high public-debt-to-GDP ratio leaves little room for fiscal stimulus. However, investing more in physical and social infrastructure is critical to raising living standards for all. This should be financed by a comprehensive reform of income and property taxes. Restoring credit discipline and cleaning up banks' balance sheets will be instrumental to support the credit growth needed to finance more business investment.

Trade openness has increased, partly driven by a competitive service sector. Manufacturing has lagged behind, with limited contribution to exports and job creation, leaving many workers in low-paid jobs. Promoting quality job creation in manufacturing would require reducing further restrictions on FDI and trade, modernising labour regulations and providing better education and skills. Better infrastructure, transport and logistic services would facilitate manufacturing firms' access to global markets, particularly from remote and poorer regions.

Robust consumption and a rebound in exports are boosting growth.

Growth remains strong. Private consumption has been buoyant, boosted by the increase in public wages and pensions and by higher agricultural and rural incomes. The costs of the withdrawal of high denomination notes – demonetisation – in November 2016 are wearing off, and sales of cars and two-wheelers have bounced back. Investment has so far failed to rebound, despite government efforts to develop rail, road and energy infrastructure and to improve the ease of doing business. Excess capacity (e.g. in the steel sector) and the weak financial position of some corporations, combined with large non-performing loans for most public sector banks, have restrained business investment. Exports have picked up, driven by strong demand from Asia and the euro area. Higher oil prices and gold imports, coupled with a decline in remittances inflows, are reflected in some deterioration in the current account deficit. However, the deficit remains well below its longer-term average. FDI net inflows have been rising steadily since 2014 and are fully financing the current account deficit.

Structural reforms are key to promoting inclusive growth

The acceleration of structural reforms is bringing a new growth impetus. The Goods and Services Tax (GST), to be implemented from July 2017, should help make India more of a single market and thus spur productivity, investment, competitiveness, job creation and incomes. The abolition of the Foreign Investment Promotion Board, which reviewed foreign investment programmes, should promote FDI inflows. The central government's initiative to rank individual states on the ease of doing business is opening a new era of structural reforms. Many states have already modernised regulations and administrative procedures and some are experimenting with reforms of land acquisition and labour regulations. There is little room for further cuts in interest rates. Consumer price inflation hovered below 4% at the end of 2016 and in early 2017, reflecting partly demonetisation, but also the success of the flexible inflation targeting framework. Ongoing structural reforms, including efforts to reduce the fragmentation of agricultural markets and land plots, and to develop the irrigation network, should help avoid inflation spikes in the future. In the short term, however, keeping inflation around 4% – the mid-point official inflation target – will be challenging given the roll-out of the GST and the upward adjustment in house rent allowance and in wages for state government employees. The combined deficit

and debt of the central government and states are relatively high. The central government has committed to reduce its deficit further in FY 2017/18 by better targeting fertiliser, petroleum and food subsidies. At the state level, current spending has tended to rise while investment targets have not always been met. The recent write-off of bank loans to farmers in the largest state will push up public debt, especially if other states follow suit. It could also undermine credit discipline and exacerbate income inequality since it will not benefit the poorest farmers, who rely predominantly on informal money lenders rather than banks. Making growth more inclusive would require raising more revenue from property and personal income taxes to finance better social and physical infrastructure. Recent initiatives to benchmark states' social policies and outcomes, including health, sanitation and education, will strengthen incentives to improve the quality of public services. However, providing quality services to all would require raising public spending. Doubling public spending on health to 2.5% of GDP by 2025, as envisaged in the latest National Health Policy, and developing affordable housing for the poor would be welcome. It could be financed by removing the tax expenditures that benefit the rich most, freezing the personal income thresholds from which rates apply, reducing tax evasion and implementing fairer property taxation.

Growth increases will rest on the revival of investment

Growth is projected to increase further. Private consumption will remain steady as increases in wages and pensions for central government employees are followed by similar adjustments in the states. The recent increase in capacity utilisation, coupled with the rebound in industrial production for capital goods and manufacturing indices, bodes well for a gradual revival of private investment. The implementation of the GST, by lowering the price of capital goods, and the cut in the corporate income tax rate should also support investment. Inflation will likely increase from the low levels in early 2017, but will remain within the authorities' target band. The revival of (import-intensive) corporate investment, higher oil prices and lower remittance flows will be reflected in a larger current account deficit. The prospect of further structural reform is a clear positive risk for growth. The deterioration in the quality of banks' portfolios, as shown by the increase in nonperforming loans and stressed assets, risks damping investment and growth. India, as a net commodity importer, would suffer from higher commodity prices. Protectionist measures could restrict exports of goods and services and thus harm the economy's potential to create quality jobs.

POWER SECTOR INDIA

Power is one of the most critical components of infrastructure crucial for the economic growth and welfare of nations. The existence and development of adequate infrastructure is essential for sustained growth of the Indian economy.

India's power sector is one of the most diversified in the world. Sources of power generation range from conventional sources such as coal, lignite, natural gas, oil, hydro and nuclear power to viable non-conventional sources such as wind, solar, and agricultural and domestic waste. Electricity demand in the country has increased rapidly and is expected to rise further in the years to come. In order to meet the increasing demand for electricity in the country, massive addition to the installed generating capacity is required.

India ranks third among 40 countries in EY's Renewable Energy Country Attractiveness Index, on back of strong focus by the government on promoting renewable energy and implementation of projects in a time bound manner.

India has moved up 73 spots to rank 26th in the World Bank's list of electricity accessibility in 2017, according to Mr Piyush Goyal, Minister of State (Independent Charge) for Power, Coal, Renewable Energy and Mines, Government of India.

Market Size

Indian power sector is undergoing a significant change that has redefined the industry outlook. Sustained economic growth continues to drive electricity demand in India. The Government of India's focus on attaining 'Power for all' has accelerated capacity addition in the country. At the same time, the competitive intensity is increasing at both the market and supply sides (fuel, logistics, finances, and manpower).

Total installed capacity of power stations in India stood at 330,260.53 Megawatt (MW) as on May, 2017.

The Ministry of Power has set a target of 1,229.4 billion units (BU) of electricity to be generated in the financial year 2017-18, which is 50 BU's higher than the target for 2016-17. The annual growth rate in renewable energy generation has been estimated to be 27 per cent and 18 per cent for conventional energy.

The Government has added 10.2 Giga Watts (GW) of conventional energy generation capacity and 12.5 GW of renewable energy capacity in Financial Year 2017

Under the 12th Five Year Plan, the Government has added 93.5 GW of power generation capacity, thereby surpassing its target of 88.5 GW during the period.

Investment Scenario

Around 293 global and domestic companies have committed to generate 266 GW of solar, wind, mini-hydel and biomass-based power in India over the next 5–10 years. The initiative would entail an investment of about US\$ 310–350 billion.

Between April 2000 and March 2017, the industry attracted US\$ 11.59 billion in Foreign Direct Investment (FDI).

Some major investments and developments in the Indian power sector are as follows:

- Greenko Energy Holdings, has raised US\$ 155 million from its existing investors, Abu Dhabi Investment Authority (ADIA) and Singapore's sovereign wealth fund GIC, which will be utilised for expanding its clean energy portfolio to 3 gigawatts (GW) from 2 GW at present.
- Private equity (PE) investment firm, Actis LLP, is planning to invest about US\$ 500 million in Solenergi Power Pvt Ltd, its second renewable energy platform in India.
- Mahindra and Mahindra Ltd is planning to invest in high-end electric powertrain technology in a move towards the future of mobility as well as for the electrification of its existing and future line-up of products.
- Hero Future Energies Pvt Ltd is planning to foray into the battery storage business and set up solar charging stations for electric vehicles (EV) in India to capitalise on India's emerging EV market.
- The Asian Development Bank (ADB) and the Punjab National Bank (PNB) have signed a financing loan worth US\$ 100 million, which will be used to support solar rooftop projects on commercial and industrial buildings across India.
- Tata Capital Ltd and International Finance Corporation (IFC) have invested Rs 200 crore (US\$ 31.05 million) in their joint venture (JV), Tata Cleantech Capital Ltd (TCCL), to increase its loan book for investing in renewable energy projects.
- CDC Group Plc, a development finance institution, plans to set up its own renewable energy platform in the eastern states of India like Bihar, Odisha and Assam, and other neighbouring countries to focus on developing hundreds of megawatts (MWs) of high-quality greenfield generational capacity.
- Japan's JERA Co. Inc, has acquired a 10 per cent stake in ReNew Power Ventures Pvt. Ltd for US\$ 200 million, valuing the company at US\$ 2 billion before its proposed Initial Public Offer (IPO).
- The Indian Railways is looking to award six tenders worth Rs 8000 crores (US\$ 1.2 billion), for setting up of a country-wide electricity transmission network, as part of a strategy to reduce electricity bills.
- Renewable energy company ReNew Power has announced securing US\$ 390 million debt funding from its existing investor Asian Development Bank (ADB) for developing and expanding capacities of 709 megawatt (MW) across various states of India.
- International Finance Corporation (IFC), along with IFC Global Infrastructure Fund, the private equity fund of IFC Asset Management Company, has announced investment of US\$ 125 million equity in Hero Future Energies, which will help the firm set up 1 gigawatt (GW) of greenfield solar and wind power plants over the next one year.

Government Initiatives

The Government of India has identified power sector as a key sector of focus so as to promote sustained industrial growth. Some initiatives by the Government of India to boost the Indian power sector:

- The Ministry of Power, Government of India, has taken various measures to achieve its aim of providing 24X7 affordable and environment friendly 'Power for All' by 2019, which includes preparation of state specific action plans, and implementation of Green Energy Corridor for transmission of renewable energy, among other measures.
- India has become an associate member of the International Energy Agency (IEA), which makes the Paris-based body more significant, indicating India's growing prominence in playing an important role in the global energy dialogue, according to the IEA.

- The Government of India plans to auction coal blocks for commercial mining by the end of December 2017, which would end the monopoly of state-run firms in coal mining and help in achieving the country's target of producing 1 billion tonnes of coal by 2020.
- The Cabinet Committee on Economic Affairs (CCEA) has approved a new coal linkage policy, aimed at providing necessary supply of fuel to power plants through reverse auction
- The Government of India has announced plans to implement a US\$ 238 million National Mission on advanced ultra-supercritical technologies for cleaner coal utilisation.
- The Cabinet Committee on Economic Affairs (CCEA) has approved the enhancement of capacity of the Scheme for Development of Solar Parks and Ultra Mega Solar Power Projects from 20,000 megawatt (MW) to 40,000 MW, which will ensure setting up of at least 50 solar parks each with a capacity of 500 MW and above in various parts of the country.
- The Union Cabinet, Government of India has given its ex-post facto approval for signing of a Memorandum of Understanding (MoU) on Renewable Energy between India and Portugal, which will help strengthen the bilateral cooperation between the two countries.
- The Ministry of New and Renewable Energy plans to introduce a fixed-cost component to the tariff for electricity generated from renewable energy sources like solar or wind, in a bid to promote a green economy.
- The Union Cabinet has approved the ratification of International Solar Alliance's (ISA) framework agreement by India, which will provide India a platform to showcase its solar programmes, and put it in a leadership role in climate and renewable energy issues globally.

The Road Ahead

The Indian power sector has an investment potential of Rs 15 trillion (US\$ 225 billion) in the next 4–5 years, thereby providing immense opportunities in power generation, distribution, transmission, and equipment, according to Union Minister Mr Piyush Goyal.

The government's immediate goal is to generate two trillion units (kilowatt hours) of energy by 2019. This means doubling the current production capacity to provide 24x7 electricity for residential, industrial, commercial and agriculture use.

The government has electrified 13,000 villages so far out of the total 18,452 villages and is targeting electrification of all villages by 2019, within the targeted 1,000 days.

The Government of India is taking a number of steps and initiatives like 10-year tax exemption for solar energy projects, etc., in order to achieve India's ambitious renewable energy targets of adding 175 GW of renewable energy, including addition of 100 GW of solar power, by the year 2022. The government has also sought to restart the stalled hydro power projects and increase the wind energy production target to 60 GW by 2022 from the current 20 GW.

A. STATUTORY AND COMMERCIAL LAWS

The Companies Act, 1956

The Act deals with laws relating to companies and certain other associations. It was enacted by the parliament in 1956. The Companies Act primarily regulates the formation, financing, functioning and winding up of companies. The Act prescribes regulatory mechanism regarding all relevant aspects including organizational, financial and managerial aspects of companies. Regulation of the financial and management aspects constitutes the main focus of the Act. In the functioning of the corporate sector, although freedom of companies is important, protection of the investors and shareholders, on whose funds they flourish, is equally important. The Companies Act plays the balancing role between these two competing factors, namely, management autonomy and investor protection.

The Companies Act, 2013

The Companies Act, 2013, has replaced the Companies Act, 1956 in a phased manner. The Act received the assent of President of India on 29th August 2013. At present almost all the provisions of this law have been made effective except a very few. The Ministry of Corporate Affairs, has also issued rules complementary to the Companies Act, 2013 establishing the procedure to be followed by companies in order to comply with the substantive provisions of the Companies Act, 2013.

Competition Act, 2002

The Competition Act, 2002 “prohibits anti-competitive agreements, abuse of dominant positions by enterprises and regulates “combinations” in India. The Competition Act also established the Competition Commission of India (the “CCI”) as the authority mandated to implement the Competition Act. The provisions of the Competition Act relating to combinations were notified recently on March 4, 2011 and came into effect on June 1, 2011. Combinations which are likely to cause an appreciable adverse effect on competition in a relevant market in India are void under the Competition Act. A combination is defined under Section 5 of the Competition Act as an acquisition, merger or amalgamation of enterprise(s) that meets certain asset or turnover thresholds. There are also different thresholds for those categorized as Individuals and Group. The CCI may enquire into all combinations, even if taking place outside India, or between parties outside India, if such combination is Likely to have an appreciable adverse effect on competition in India. Effective June 1, 2011, all combinations have to be notified to the CCI within 30 days of the execution of any agreement or other document for any acquisition of assets, shares, voting rights or control of an enterprise under Section 5(a) and (b) of the Competition Act (including any binding document conveying an agreement or decision to acquire control, shares, voting rights or assets of an enterprise); or the board of directors of a company (or an equivalent authority in case of other entities) approving a proposal for a merger or amalgamation under Section 5(c) of the Competition Act. The obligation to notify a combination to the CCI falls upon the acquirer in case of an acquisition, and on all parties to the combination jointly in case of a merger or amalgamation.

Indian Contract Act, 1872

Indian Contract Act codifies the way we enter into a contract, execute a contract, and implement provisions of a contract and effects of breach of a contract. The Act consists of limiting factors subject to which contract may be entered into, executed and breach enforced as amended from time to time. It determines the circumstances in which promise made by the parties to a contract shall be legally binding on them. Each contract creates some right and duties upon the contracting parties. Indian contract deals with the enforcement of these rights and duties upon the parties.

The Indian Contract Act also lays down provisions of indemnity, guarantee, bailment and agency. Provisions relating to sale of goods and partnership which were originally in the Act are now subject matter of separate enactments viz., the Sale of Goods Act and the Indian Partnership Act. The objective of the Contract Act is to ensure that the rights and obligations arising out of a contract are honoured and that legal remedies are made available to those who are affected.

Negotiable Instruments Act, 1881

In India, cheques are governed by the Negotiable Instruments Act, 1881, which is largely a codification of the English Law on the subject. The Act provides effective legal provision to restrain people from issuing cheques without having sufficient funds in their account or any stringent provision to punish them in the event of such cheque not being honoured by their bankers and returned unpaid. Section 138 of the Act, creates statutory offence in the matter of dishonour of cheques on the ground of insufficiency of funds in the account maintained by a person with the banker which is punishable with imprisonment for a term which may extend to two year, or with fine which may extend to twice the amount of the cheque, or with both.

The Registration Act, 1908 (“Registration Act”)

The Registration Act was passed to consolidate the enactments relating to the registration of documents. The main purpose for which the Registration Act was designed was to ensure information about all deals concerning land so that correct land records could be maintained. The Registration Act is used for proper recording of transactions relating to other immovable property also. The Registration Act provides for registration of other documents also, which can give these documents more authenticity. Registering authorities have been provided in all the districts for this purpose.

Indian Stamp Act, 1899(the “Stamp Act”)

Stamp duty must be paid on all instruments specified under the Stamp Act at the rates specified in the schedules to the Stamp Act. The applicable rates for stamp duty on instruments chargeable with duty vary from state to state. This act was enacted by Parliament in the Forty-seventh Year of the Republic of India to consolidate and amend the law relating to domestic arbitration, international commercial arbitration and enforcement of foreign arbitral awards as also to define the law relating to conciliation and for matters connected therewith or incidental thereto. The main objectives of the Act is to comprehensively cover international and commercial arbitration and conciliation as also domestic arbitration and conciliation, to make provision for an arbitral procedure which is fair, efficient and capable of meeting the needs of the specific arbitration, to provide that the arbitral tribunal gives reasons for its arbitral award, to ensure that the arbitral tribunal remains within the limits of its jurisdiction, to minimise the supervisory role of courts in the arbitral process, to permit an arbitral tribunal to use mediation, conciliation or other procedures during the arbitral proceedings to encourage settlement of disputes, to provide that every final arbitral award is enforced in the same manner as if it were a decree of the court, to provide that a settlement agreement reached by the parties as a result of conciliation proceedings will have the same status and effect as an arbitral award on agreed terms on the substance of the dispute rendered by an arbitral tribunal and to provide that, for purposes of enforcement of foreign awards, every arbitral award made in a country to which one of the two International Conventions relating to foreign arbitral awards to which India is a party applies, will be treated as a foreign award.

The Goods and Services Tax Act, 2017

Goods and Services Tax (GST) is considered to be the biggest tax reform in India since independence. It will help realise the goal of “One Nation-One Tax-One Market.” GST is expected to benefit all the stakeholders – industry, government and consumer.

Goods and Services Tax (GST) is an indirect tax throughout India and was introduced as The Constitution (One Hundred and Twenty Second Amendment) Act 2017, following the passage of Constitution 122nd Amendment Bill. The GST is governed by GST Council and its Chairman is Union Finance Minister of India - Arun Jaitley. This Act has been made applicable with effect from 1st July 2017. With the introduction of GST all central, state level taxes and levies on all goods and services have been subsumed within an integrated tax having two components – central GST and a state GST. Thus there will be a comprehensive and continuous mechanism of tax credits. The Central government passed four sets of GST Acts in the Budget session this year. These were Central GST Act, 2017; Integrated GST Act, 2017; Union Territory GST Act, 2017 and GST (Compensation to States) Act, 2017. The Acts were approved by the Parliament after they were introduced as the part of the Money Bill. Following the passage of GST Acts, the GST council has decided 4 tax rate slabs viz., 5%, 12%, 18% and 28% on supply of various goods and services. India has adopted a dual GST model, meaning that taxation is administered by both the Union and State Governments. Transactions made within a single State will be levied with Central GST (CGST) by the Central Government and State GST (SGST) by the government of that State. For inter-state transactions and imported goods or services, an Integrated GST (IGST) is levied by the Central Government. GST is a consumption-based tax, therefore, taxes are paid to the State where the goods or services are consumed and not the State in which they were produced.

The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

Such conditions include (i) the activities of the investee company are under the automatic route under the foreign direct investment (“FDI”) Policy and the non-resident shareholding is within the sectoral limits under the FDI policy; and (ii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.
